

# Music Video

Have you ever wanted to make a music video? Do you want to be a star? Now is your chance! Grab someone in your family to help out and get started. First, decide how you will film. There are lots of apps that make creating a music video quite easy. One app we have used in class is called Video Star. Search where you get your apps and you will find that there are many to choose from. You can also film without an app, but I have found that an app is really helpful. It's good at guiding you through the process and makes editing seamless. Once you have your plan, grab a partner, decide on a song, and go to work. Remember, these can be serious and emotional, or just plain silly; you decide!
