Photography, 3-8, Black & White vs Color Mrs. Kelley

For this activity, we're going to compare black & white pictures with color. Take some pictures in both color and black & white, or make a second copy of your picture and edit one of them to be black and white. Sometimes color can be distracting from the main subject you are photographing. Black & white also has a timeless look to it, and it can show more emotion & depth in your picture.

Compare the two images. Which one has more impact? Which one makes the subject of your photo stand out more? Do you have a general preference of color or black & white pictures?

Here are some examples:
